

## Research Project Fact Sheet

Title of Project	A Concept for Promotion of Sustainable Retrofitting and Renovation in Early Stages
Project Acronym	ACES
Funding Program	Strategic. Networking of RDI Programmes in. Construction and Operation of Buildings
Call Identifier	ERACOBUILD
Total Budget	≈ 400000€
Starting – Ending Date	03/2011-09/2013
Consortium	1. Frederick Research Centre, Coordinator 2. KTH Royal Institute of Technology, Sweden 3. DTU Technical University of Denmark
Project Objectives	<ol style="list-style-type: none"> <li>1. ACES project aims to show how restoration that results in sustainable development can be motivated by economical reasons. Also, this project aims to explain how quality assurance and how workers health issues can contribute to this. Another objective of this project is to produce documents that will motivate stake holders to continue their development towards sustainable renovation.</li> <li>2. The work will focus on the building owners' interests and needs. It will include both innovative and well-known measures for improving a building with respect to the performance wanted. We will also focus on how the measures in question will be possible to use in a structured way in a safe and effective building process.</li> <li>3. ACES project will focus on early phases of a building project, when decisions about technologies are to be done. In these phases the building owner needs a lot of information of good quality. This project will deal with how to obtain this information and how to make it useful.</li> </ol>
Work Packages	WP1: Visions and possibilities for building renovation WP2: Evaluation of economic and environmental benefits for restoration WP3: Predictable quality WP4: Process and safety issues WP5: Quality control and dissemination of results WP6: Project management
