

ENVIRONMENTAL POLICY

At the Sustainable Energy Research Group (SERG) of Frederick University, we are dedicated to advancing research in sustainable energy solutions while minimizing our environmental impact.

We pledge to conduct our research with a commitment to environmental conservation and sustainability. This includes reducing energy consumption, promoting renewable energy sources, minimizing waste generation, minimising water consumption and protecting the atmosphere throughout our research activities. Through collaboration, innovation, and responsible practices, SERG strives to contribute positively to a greener and more sustainable future for our community and beyond.

Academic Supervisor

A handwritten signature in blue ink, appearing to read "T. Howard", is written over a horizontal line. The signature is stylized and cursive.
